

Our Children are not safe !

Please help keep our children safe by **NOT** parking on Rossett Avenue. It beggars belief that there are about 6 cars ,who constantly put your child's safety at risk. Unbelievably ,some actually park **ON** the emergency vehicles only hatching and waltz off into school leaving their car !

This is very selfish, irresponsible behaviour and a host of parents , governors and community members including residents,our lollipop lady & the children's centre are all very concerned about our children's safety.

There are **3** safety issues . **Firstly**, how on earth do these people think an ambulance could come to school ?— they need to think- what if it was **their** child who desperately needed the aid of a paramedic !

Secondly ,they are trying to do 3 point turns in a tiny cul de sac ,where other irresponsible (non-residents) have parked- a child could easily get run over.

Thirdly ,they are actually parking up on the pavement, thereby forcing buggies & wheelchairs onto the road rendering them vulnerable to be knocked over.

Only modern schools are designed for kiss & drop -ours was built well over 50 years ago & is **not** designed for car drop -offs. So either **walk** ,which would save money and be better for you & your child **OR** park in a safe place ,away from both school entrances. The behaviour at the back of school is equally dangerous & again carried out by the same few offenders.

Please **STOP & think !** What if your child needed an ambulance ? What if your child was run over by a car ,parking where they shouldn't?

Don't put our kids lives at risk because you feel lazy -Just walk the extra few metres .
